

Issaquah High Student Profile

Eunseo Kwak

IHS Class of 2021

What classes at school do you love and why?

I love my Career and Tech Education classes! My personal favorites have been Sales & Marketing, AP Economics, and AP Psychology. These three classes have been the most useful in real life outside of school, and in learning skills that I can use no matter what I do.

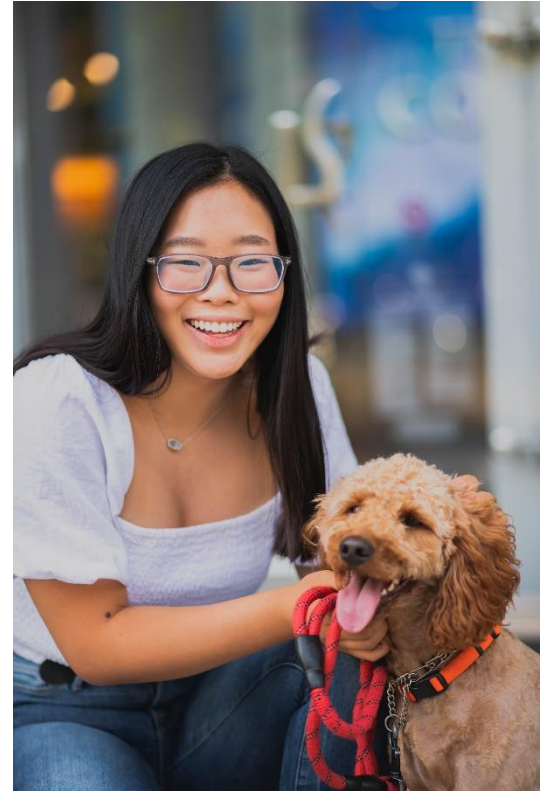

What are some of your favorite high school memories?

Some of my favorite high school memories are competing on our girls swim team! I love going to championship meets like Districts and cheering for all the talented girls on our team. Swimming has been a part of my life since I was little, and I love being in the water and getting to represent IHS!

Are you in a club and if so, what are the best parts of being in that club? Any memorable experiences you would like to share?

I am super involved in DECA, a business club that prepares high schoolers for the business world after high school or college. I would say that beyond the business aspect, the best part of DECA is the amount of career preparation I was able to get. I've gotten tips on buffing up my resume, gotten to talk to UW Foster professors, and met countless businesspeople who have given high schoolers advice on how to jump-start their careers. Join DECA! It is so worth it and there is something there for everybody.

My favorite DECA memories are helping first-year members figure out what event they want to compete in and what they are passionate about, and also attending the International Career Development Conference in 2019!

Is volunteering part of your life? If so, tell us about your volunteering experiences and what you love about them?

Volunteering has been a huge part of my life. I've been a Girl Scout since I was five, and I've been volunteering at a nearby summer camp for the past five years that I was originally a camper at. These experiences have been so much fun and helped me make amazing friends, as well as learn how to be a leader.

Any plans yet after high school? If so, tell us about them.

I plan to pursue a secondary education at a four-year university to major in business and data science! After college, I hope to pursue a career in data analytics and consumer psychology.

What do you do for fun? Please share more about what you do for fun in your spare time.

I love to work out, swim, and walk my dog Mia! All of my friends know that I am absolutely obsessed with my dog and spend all my spare time taking her to crazy places.
